

MONTHLY REPORT OF RIVER AND FLOOD CONDITIONS

REPORT FOR:

MONTH

YEAR

November

1998

SIGNATURE

Amy McCullough

In Charge of HSA

TO: Hydrometeorological Information Center, W/OH2
NOAA / National Weather Service
1325 East West Highway, Room 7230
Silver Spring, MD 20910-3283

DATE

December 5, 1998

When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts, and hydrologic products issued (WSOM E-41).

☒ No flood stages were reached in this HSA for the month above.

During the month of November, West Central Texas received near normal rainfall over most of the area. A few locations over the Western Concho Valley and Northern Big Country received below normal rainfall for the month. The heaviest rain fell during the early morning hours on the first of the month when a pacific cold front pushed through the region. Rainfall amounts averaged around 1/2 to 1 inch. Another round of storms on the 13th brought around 1/3 to 1/2 inch of rain to West Central Texas. No flash flood or flood warnings were issued in November and no flooding was reported.

Rainfall was near normal for November, but yearly totals remain well below normal. San Angelo received 1.06 inches of rain in November, which is 0.02 inches below normal. Abilene received 1.06 inch of rainfall, 0.42 inches below normal. For the year, San Angelo remains below normal with 12.49 inches (7.17" below normal). Abilene also remains well below normal for the year with 12.51 inches, 10.86 inches below normal. Cooperative observers' rainfall reports for November include:

Albany	1.86	Junction 4SSW	1.01
Ballinger	1.90	Menard	2.87
Brownwood	2.42	Ozona	1.38
Coleman	3.43	Robert Lee	2.64
Colorado City	0.74	Sonora	2.63
Haskell	0.45	Sterling City 8NE	1.23
Lawn	0.35	Trent	0.08

The soil moisture remains dry across West Central Texas, and the threat of flooding remains low.
